### Instructions regarding reporting templates

#### IR.17.01 — Non-life technical provisions

##### General comments

This section relates to quarterly and annual submission of information for individual entities, third country branches, ring-fenced funds, matching adjustment portfolios and remaining part.

Undertakings may apply appropriate approximations in the calculation of the technical provisions as referred to in Technical Provisions – Further Requirements 6. In addition, Supervisory Statement SS8/24 3.2 may be applied to calculate the risk margin during the financial year.

Third country branches should read any reference to ‘technical provisions’ as the provisions for insurance and reinsurance obligations referred to in Third Country Branches 6.1.

Line of Business for non-life obligations: The lines of business, referred to in Technical Provisions 10.1, as defined in Technical Provisions – Further Requirements Annex 1, referred to direct business/accepted proportional reinsurance and accepted non-proportional reinsurance. The segmentation shall reflect the nature of the risks underlying the contract (substance), rather than the legal form of the contract (form).

Health direct insurance business pursued on a non-similar technical basis to life insurance shall be segmented into Non-Life line of business 1 to 3.

Accepted proportional reinsurance shall be considered together with the direct business in the C0020 to C0130.

The information to be reported between R0060 and R0280 shall be after the volatility adjustment, the matching adjustment and the transitional adjustment to the relevant risk-free interest rate term structure if applied.

For the purpose of this template ‘allocated loss adjustment expenses (ALAE)’ means: the costs of processing and resolving claims that could be assignable to individual claim (e.g. legal and adjuster’s fees).
